

## GROW BIOINTENSIVE REGENERATIVE FARMING AND AGROECOLOGY FOR RELIGIOUS LEADERS

Religious leaders from different religions during a 4 days training at the G-BIACK Centre

The GROW BIOINTENSIVE Agriculture Centre of Kenya G-BIACK organized a 4 days training for religious leaders with the aim of teaching and providing them with skills in GROW BIOINTENSIVE regenerative farming and agroecology so that they may become catalysts/multipliers in their communities of worship. 40 Key religious leaders from different religions attended the training.

Religious leaders are often the most respected figures in their communities. Buddhist monks and nuns, imams, pastors, priests, punjaris, and leaders of other faith communities play a powerful role in shaping attitudes, opinions and behaviors because their members trust them. Community members and political leaders listen to religious leaders.

Especially at the family and community level, religious leaders have the power to raise awareness and influence attitudes, behaviors and practices. They can shape social values in line with faith-based teachings. This is the reason why G-BIACK invited these leaders so that they can as well incorporate issues of food sovereignty in their teachings.

At the end of the training, the religious leaders unanimously resolved that they will include a GROW BIOINTENSIVE curriculum in their teachings and they will be inviting G-BIACK staff to teach their members.
