The year 2013 was another very successful year for the GROW BIOINTENSIVE Agriculture Centre of Kenya. Many things happened that saw the organization making strides in terms of reaching out to the needy farming communities as well as organizational development. Some of the key activities were:

1. The construction of the G-BIACK hostels (first floor)
2. Reaching and training more than 3000 small holder farmers
3. Construction of the exhibition room for the Women Centre income-generation skills training courses. The work of the women may be purchased at the exhibition room.
4. Introduction of a GROW BIOINTENSIVE mini farming programme in 2 schools

In the year 2014, G-BIACK will focus on the following general activities

1. Reached and teaching at least 3000 small holder farmers
2. Consolidating and strengthening the existing programmes, especially food security and the women programmes.
3. Expanding the intern programme and providing good accommodation to our interns at our new hostel.
4. Strengthen the Youth Against Poverty Programmes (YAPPS)

For centre development, G-BIACK will strive to accomplish the following
- Acquire a sustainable water supply at the centre, either by sinking a borehole or by constructing underground water storage to collect rainwater
- Complete the construction of the hostels (addition of second floor)
- Purchase either a mini bus for ferrying farmers or pickup truck for ferrying farm produce to the market
- Complete the fencing of the G-BIACK property

We wish to welcome you to join with us or to visit us as we accomplish these activities.
