## Tabitha from Bariki Community Center Trains in Sustainable Farming at G-BiACK

G-BiACK is pleased to welcome Tabitha from Bariki Community Center, who has joined us for a one-week training program on the GROW BIOINTENSIVE method. During her stay, Tabitha will gain hands-on experience in sustainable farming practices designed to improve soil fertility, conserve resources, and increase yields using locally available inputs. This training will equip her with the skills and knowledge to promote food security and environmental stewardship within her community. We look forward to seeing the impact she will make as

## QUOTE OF THE WEEK

“

Don't wait for the right opportunity, create it.

“

Whoever watches the wind will not plant; whoever looks at the clouds will not reap

**Eccles 11:4 NIV**

## VERSE OF THE WEEK

## IITA Visits to Strengthen Agricultural Innovation, Network and Collaborate.

The International Institute of Tropical Agriculture (IITA) visited G-BiACK where it interfaced the advancement of sustainable agriculture. The meeting touched on collaborative research,

seedling growth, and training of farmers in an attempt to increase food security and buffer against climate change effects. Through this visit, the IITA signals a step toward establishing a partnership linkage between farming communities at the local grounds and global interaction in agricultural

expertise. IITA's visit focused on strengthening partnerships that bridge cutting-edge agricultural research with practical solutions for small-holder farmers. Discussions also explored ways to promote indigenous crop varieties, enhance food security, and support

farmer training programs. “This engagement opens the door to transformative agricultural practices that can empower farmers and protect our environment,”

## GROW BIOINTENSIVE Food Sovereignty

Promoting sustainable farming in Kenya, GROW BIOINTENSIVE Farm, Knowledge Centre for Organic Agriculture, is at the forefront of sustainable agriculture. Since 2008, the farm has been an epicenter of training and imparting knowledge on food.

In a flash of photographic success, Mary (featured on the photo) shows crops with pride. The products stand for the centre's commitment to good soil, biodiversity, and environmentally friendly practices.

We're glad to wish you a Happy International Youth Day from G-BiACK!

Let's celebrate the vigor, creativity, and resilience of youth everywhere. For G-BiACK, youth are the future of change, innovating in operations for sustainable agriculture, protecting the environment, and ensuring food security.
