EVENT

GROW

G-BLACK's Internship Program is giving young people from across the region, including Kenya, Sudan, and beyond, the chance to grow their skills while making a real impact in communities.

Through hands-on training in agroecology, and fieldwork, interns gain practical experience that bridges the gap between theory and practice. The program also helps participants discover their potential as leaders and change-makers.

It is more on the hands on skills than the theory. Real world experience

SIRI NI MBEGU YA KIENYEJI!

Indigenous seeds remain the hidden strength behind resilient farming and food security. Unlike hybrid or imported varieties, local seeds are deeply adapted to the soils, climate, and traditions of our communities, making them reliable even under changing weather conditions.
