## CREP Unlocks A GROW BIOINTENSIVE Farm Secret

This week G-BiACK hosted Community Rehabilitation & Environmental Protection (CREP) staff for a learning visit. The team came to see first hand for themselves how G-BiACK operates, especially regarding practices of the sustainable agriculture approach and trainings provided for farmers. It was an opportunity for CREP team to know in detail how we work, from the Initiation of GROW BIOINTENSIVE to how we work with different farming communities in the pathways toward food sovereignty, security and resilience. It was also a very enriching exchange highlighting how sharing knowledge and collaboration must be nurtured between these two organizations for sustainable agriculture.

## BIBA Kenya & G-BiACK Featured on KBC TV to Champion Agroecology in Kenya

Collins Chibole During the Live Session

This week, G-BiACK was featured on KBC Channel 1, to discuss the growing role of agroecology in building resilient food systems. Represented by Collins Chibole, G-BiACK shared the platform alongside BIBA Kenya, a partner organization, to highlight the challenges farmers face today.

The interview provided a platform to share G-BiACK's efforts in promoting sustainable farming methods and showcased the importance of collaboration in strengthening agroecological practices for food security in Kenya.
