## Kajiado Farmers Complete Two-Day Agroecology Workshop At G-BiACK

Participants pose with certificates after completing the two-day agroecological farming workshop.

Farmers from Kajiado County gathered for a two-day intensive training workshop at the Grow Biointensive Agriculture Center of Kenya (G-BiACK), aimed at strengthening their knowledge and skills in sustainable agriculture. The workshop, supported by ActionAid, brings together participants to engage in practical learning, knowledge exchange, and discussions on improving farm productivity while conserving the environment.

The training focuses on Biointensive farming techniques, soil health management, and climate-resilient practices tailored to the needs of smallholder farmers. Through hands-on sessions and demonstrations, participants are gaining valuable insights into efficient land use, composting, and crop diversity.

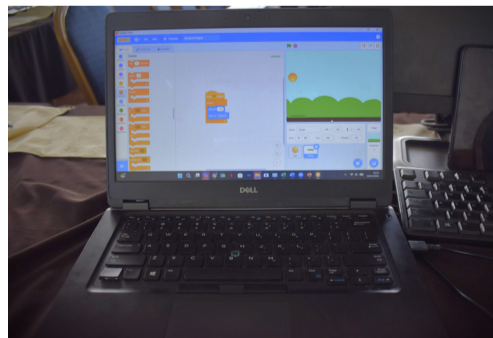

“The workshop is part of ongoing efforts by G-BiACK and ActionAid to empower farming communities, enhance food security, and promote environmentally friendly agricultural practices across the region.” - Sam Nderitu

Speaking during the session, facilitators emphasized the importance of equipping farmers with sustainable methods that not only increase yields but also protect natural resources. The farmers, in turn, have expressed enthusiasm and appreciation

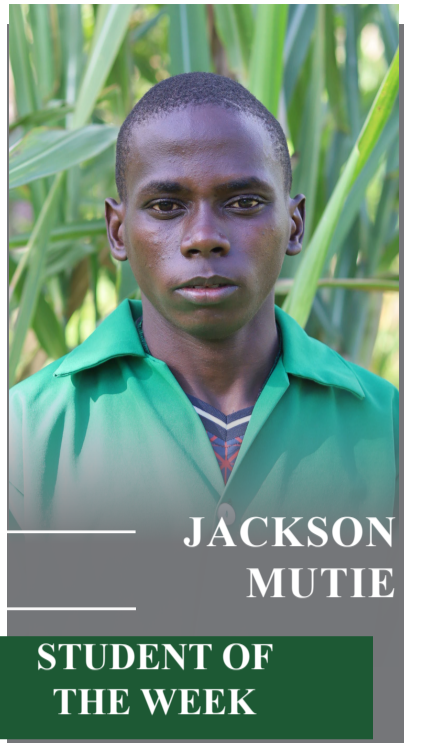

## Basic coding language for Community kids boost to STEM

Learners take part in a hands-on computer and coding session.

Today was a basic coding introduction for learners in Grade 6 to 9. Images from the session show a full computer lab, of more than 60 young learners a Scratch interface on screen and a learning environment built around hands-on digital exploration. The activity offered an early, practical doorway into coding within the CBC journey.
